

XMicrobe™

**WHAT MAKES
OUR TECHNOLOGY
DIFFERENT MAKES
US STRONGER AND
LONGER LASTING:**

Proven effective at reducing germs and odor-causing bacteria in over thirty years of product and building applications.

Extremely long lasting technology without repeated applications

Dramatically reduces the growth of germs on surfaces.

Applications guard against surface degradation caused by microbes and effects of harsh cleaners.

Prevents stains from setting into surfaces for easier cleaning.

The only system available that actively pulls microbes from the air and eliminates them on contact, improving overall air quality.

The only system available that can truly disinfect hard surfaces fabrics, carpeting, and upholstery.

Developed by Dow Corning Technology.

AUTO KIT Antimicrobial & Sanitizer/Disinfectant

WHAT'S THE PROBLEM?

Unpleasant odors can profoundly effect your customers' experience, as well as the health and safety of your staff. Seemingly clean, tidy environments are contaminated with harmful bacteria and other microbial agents. Using our Microbe Shield® technology, indoor air quality remains high, reinforcing a positive perception of a safe, clean place.

A TRUTH AS BASIC AS THE AIR YOU BREATHE

Keeping a vehicle clean is a good start, but by no means a solution. Even freshly disinfected surfaces are subject to recontamination almost instantly, rendering them "clean" on a temporary basis, at best. Also, to be effective at killing germs, most cleaners rely on poisonous chemicals which themselves can contaminate with noxious fumes or by leaching into the surrounding environment. Worse, those germs not killed by the cleaning agents can develop future resistance to the same poison, making them even tougher to kill the next time. This is how so-called "super bugs" are created. There has simply never been a viable answer to these problems- until now.

IT'S A FACT.

Our Antimicrobial and Sanatizer/Disinfectant is specially formulated for professional application to protect your valuable assets from the risks associated with bacteria, mold and mildew contamination. Its specifically formulated for use on hard, non porous surfaces. It's odorless and colorless, and its nanotechnology bonding chemistry will not rub off on skin or wash out through repeated cleaning.

XMicrobe™

**REGISTRATIONS OF XMICROBE
TECHNOLOGY:** US EPA # 87583-1

THE MICROBE FREE SOLUTIONS® GAME PLAN IDENTIFIES AND TREATS MOST COMMON INDOOR CONTAMINANTS, INCLUDING:

MRSA

Staph

Colostrum Difficile

Mold

Bacteria

Fungi

Odors

Algae

Mildew

Smoke

Spores

AUTO KIT Antimicrobial & Detergent/Disinfectant

WHAT MAKES OUR PRODUCT GREEN?

- Microbe Shield® qualifies as a "Hyper-Green" solution, because it is permanently bonded to the surface and therefore never enters the environment.
- Microbe Shield® is essentially a modified sand molecule with a silane bonding agent. It is as harmless to the environment as sand.
- It uses no poisons. Its mode of antimicrobial defense is "physical" disruption of cell wall integrity, coupled with a positively charged Nano-particle (Nitrogen), which "electrocutes" harmful microbes on contact.
- It's highly durable, long lasting nature eliminates the need for frequent retreatment, which reduces the overall carbon footprint of service vehicles.
- It is not solvent based.
- It does not Vent Off-Gasses (VOCs)
- It contains no CFCs.
- It contains no ODCs.
- It is non-toxic, non-flammable and non-hazardous.
- It is safe for adults, children and pets

WHAT ARE THE FEATURES AND BENEFITS?

- 99.99% effective against a broad spectrum of microorganisms, including mold, mildew, NOROVIRUS, E. Coli, salmonella, H1N1, MRSA .
- Destroys microorganisms by attacking and physically piercing (disrupting) the cell membrane.
- Mechanical action eliminates the need for poisons.
- Helps control mold, mildew and allergens.
- Remains permanently affixed to the surface, providing unsurpassed durability.
- Bonds to virtually all materials and surfaces both painted and unpainted.
- Does not rub-off or migrate onto the skin or into the environment.
- Unlike common leaching materials, does not setup an environment that encourages the development of resistive organisms ("super bugs").
- On-going laboratory and field support.
- Accepted, registered and used worldwide.
- Extremely cost effective compared to other temporary solutions.
- Safe, proven technology
- Reduces liability exposure
