

# X Microbe™

WHAT MAKES OUR  
TECHNOLOGY  
DIFFERENT MAKES IT  
STRONG.

Our game-plan system is proven effective at reducing odors in over thirty years of product and building applications.

Extremely long lasting technology without repeated applications.

Dramatically reduces the growth of germs on surfaces.

Applications guard against costly repairs caused by mold, mildew, odors and effects of harsh air fresheners.

Prevents stains from setting into surfaces for easier cleaning.

The only system available that actively eats odors from the air and eliminates them, improving overall appearance and air quality.

The only system available that can truly help eliminate odors in fabrics, carpeting and upholstery.

Developed for  
MicrobeFree Solutions

## FreshStart Odor Control

### WHAT IS FRESHSTART ODOR CONTROL?

FreshStart Odor Control is a live bacteria that is sprayed in a vehicle or room. It creates multiple enzymes that attack and destroy different odors in the environment. Foul odors can negatively affect every person.

### HOW DOES IT WORK?

It is a living bacteria, that when applied or sprayed in an environment, creates an enzyme that feeds on odors such as pet urine, smoke, cooking, athletic odors, mold and mildew. It is also proven effective against a wide range of other odors. It is a living bacteria that creates an enzyme that constantly reproduces, doubling in size every 15 minutes.

### HOW IS IT DIFFERENT?

Our odor controlling bacteria works after just 2-3 hours upon contact, and will keep working until the odors are gone. Unlike other products that simply mask or encapsulate the odor, ours targets the source and eliminates it, so the odor does not return. Once the bacteria works through all of the odors, it disappears, leaving the surface odor-free with a Fresh Start.

The whole process is done naturally and without carcinogens. Our product is 100% green, completely harmless and organic.

**WHAT MAKES  
OUR TECHNOLOGY  
DIFFERENT MAKES US  
STRONGER AND  
LONGER LASTING:**

Extremely long lasting  
technology without  
repeated applications

Made from all natural  
non-pesticide extracts.  
100% Green!

A single application  
is easy to apply, remains  
effective and is low cost.

Child and pet safe,  
for both indoor and  
outdoor use.

Kills all forms of bedbug,  
including adults and larva,  
as well as eggs.

A few dollars per  
application, compared  
to traditional methods  
which cost \$1500 per  
room

# FreshStart Odor Control

## Auto - Marine - RV - Transport

Protect your vehicle from harmful germs, bacteria, mold, mildew and fungus with our affordable eco-friendly FreshStart Gameplan. Initially developed for NASA and the US Government, this game plan is now available for your Car, Truck, SUV, RV or Boat. Our system provides long-term protection from odor-causing bacteria and mold on the surfaces, interior fabrics, and in the air ducts of your vehicles - 24/7.

## Hotels - Hospitality

Unpleasant odors can profoundly effect your customer's experience, as well as the health and safety of your staff. Seemingly clean, tidy environments are contaminated with harmful odor-causing bacteria and other microbial agents. Using our MicrobeShield technology and FreshStart Gameplan, indoor air quality remains high, reinforcing a positive perception of your establishment as a safe, clean and pleasant place to visit.

## Residential - Health Care Facilities

Keeping a clean home or facility is a good start, but by no means a solution. Even freshly disinfected surfaces are subject to recontamination almost instantly, rendering them "clean" on a temporary basis, at best. Also, to be effective at killing germs, most cleaners rely on poisonous chemicals - which themselves can contaminate with noxious fumes or by leaching into the surrounding environment. Worse, those germs not killed by the cleaning agents can develop future resistance to the same poison, making them even tougher to kill the next time. This is how so-called "super bugs" are created. There has simply never been a viable answer to these problems - until now, with the FreshStart Gameplan.
