

XMicrobe™

WHAT MAKES OUR TECHNOLOGY DIFFERENT MAKES US STRONGER AND LONGER LASTING:

Proven effective at reducing germs and odor-causing bacteria in over thirty years of product and building applications.

Extremely long lasting technology without repeated applications

Dramatically reduces the growth of germs on surfaces.

Applications guard against surface degradation caused by microbes and effects of harsh cleaners.

Prevents stains from setting into surfaces for easier cleaning.

The only system available that actively pulls microbes from the air and eliminates them on contact, improving overall air quality.

The only system available that can truly disinfect hard surfaces fabrics, carpeting, and upholstery.

Developed by Dow Corning Technology.

ARE YOU WORRIED ABOUT MOLD, ODORS AND MILDEW GROWING IN YOUR BOAT?

Protect your boats from harmful mold, mildew, and bacteria with our affordable eco-friendly XMicrobe™ Powered by Dow Corning Technologies. Initially developed for NASA, this nanotechnology is now available for your boats and accessories.

- Guaranteed to be active on treated surfaces for 3 years
- Provides long-term protection from mold on the surfaces, interior fabrics, and in the air ducts of your vehicles- 24/7.
- Eliminate odors caused by mold and mildew.
- Non-toxic; safe for children, adults and pets.
- Products registered with the EPA
- "Green" Solution

POWERFUL ANTIMICROBIAL PROTECTION ON VIRTUALLY ANY SURFACE

Mold microbial growth on a square of interior fabric material. This is the same material type treated with XMicrobe™ Powered by Dow Corning Technologies

WHAT MAKES OUR PRODUCT GREEN?

- XMicrobe™ Powered by Dow Corning Technologies qualifies as a "Hyper-Green" solution because it is permanently bonded to the surface and therefore never enters the environment.
- XMicrobe™ Powered by Dow Corning Technologies is essentially a modified sand molecule with a silane bonding agent. It is as harmless to the environment as sand.
- It uses no poisons. Its mode of antimicrobial defense is "physical" disruption of cell wall integrity, coupled with a positively charged Nano-particle (Nitrogen), which "electrocutes" harmful microbes on contact.
- It's highly durable, long lasting nature eliminates the need for frequent retreatment, which reduces the overall carbon footprint of service vehicles.
- It is not solvent based.
- It does not Vent Off-Gasses (VOCs)
- It contains no CFCs.
- It contains no ODCs.
- It is non-toxic, non-flammable and non-hazardous.
- It is safe for adults, children and pets

WHAT ARE THE FEATURES AND BENEFITS?

- 99.99% effective against a broad spectrum of microorganisms, including mold, mildew, NOROVIRUS, E. Coli, salmonella, H1N1, MRSA .
- Destroys microorganisms by attacking and physically piercing (disrupting) the cell membrane.
- Mechanical action eliminates the need for poisons.
- Helps control mold, mildew and allergens.
- Remains permanently affixed to the surface, providing unsurpassed durability.
- Bonds to virtually all materials and surfaces both painted and unpainted.
- Does not rub-off or migrate onto the skin or into the environment.
- Unlike common leaching materials, does not setup an environment that encourages the development of resistive organisms ("super bugs").
- On-going laboratory and field support.
- Accepted, registered and used worldwide.
- Extremely cost effective compared to other temporary solutions.
- Safe, proven technology
- Reduces liability exposure
